

RIGID, MOLDED PLASTIC PIPE CASE

Pipe and drape hardware isn't cheap, so Drape Kings designed and built the most cost effective, economical solution for pipe transport. That's not to say pipe bags are not a viable solution – but if you want to protect the thin-wall aluminum pipe in a truck from other ATA style hard cases, loading and trucking, consider a hard-wall plastic pull along pipe case. With thousands in use worldwide, why consider anything else to protect your investment.
